Free Online Training cum Internship Proposal for

(Diploma, B Tech, BCA, MCA Students)

Full Stack Front-End Foundations (HTML, CSS, JavaScript)

Submitted by: ChiPi Technologies
Program Duration: 2 Months (Short-Term Training Program)
Mode: Live Online Instructor-Led Training

About ChiPi Technologies

ChiPi Technologies is a premier IT training and development organisation led by senior professionals with extensive industry experience in full stack development, cloud-native applications, automation frameworks, Machine Learning, and enterprise-grade software engineering.

Our leadership team has contributed to global organisations including IBM USA, Regence USA, Ericsson Sweden, JLL UK, Verifone USA, Patriot Coal USA, Verve Energy Australia, EFI USA and several product-based companies. We bring real-world engineering practices, coding standards, and industry methodology into every training program to bridge the gap between academia and the IT industry.

ChiPi Technologies is committed to delivering practical, job-oriented training that enhances student employability and prepares them for modern software development roles.

Purpose of the Program

The objective of this short-term training program is to provide students of Diploma, B Tech, BCA and MCA with:

- A strong foundational understanding of how modern web applications are designed and built on the frontend.
- Practical knowledge of core front-end tools and technologies: **HTML, CSS, JavaScript**, Developer Tools, Responsive Design, and UI/UX fundamentals.
- Hands-on exposure to real-world project development techniques.
- Experience in building an industry-style **frontend mini project**.
- A foundation that prepares students for advanced learning in full-stack development, internships, and entry-level IT roles.

CONFIDENTIAL

At the completion of this program, students will be capable of:

- Understanding how websites and web interfaces work end-to-end.
- Building clean, responsive, and functional web pages using HTML, CSS, and JavaScript.
- Designing structured UI layouts and integrating interactivity with JS.
- Using Chrome Developer Tools, VS Code, and version control basics.
- Developing and presenting a complete **frontend mini project**.

Benefits to Students

- **Industry-Relevant Skill Development:** Training aligned with current front-end development standards.
- **Hands-on Learning:** Every concept taught through live coding sessions and practical activities.
- **Mini Project Development:** Students create a complete multi-page responsive UI using HTML/CSS/JS.
- **Career Readiness:** Excellent foundation for internships, placements, and further full-stack learning.
- **Learning from Industry Professionals:** Practical insights, UI/UX discipline, and coding quality standards.

Benefits to the College

- Enhances institute's portfolio with globally aligned, industry-focused skill development programs.
- Strengthens student preparedness for placements and technical interviews.
- Demonstrates the institution's commitment to modern, career-oriented education.
- Builds long-term partnership opportunities for future workshops and training initiatives.

Program Structure (2 Months)

This training program is organized as an intensive **2-Month Training-cum-Project plan**, combining structured learning sessions with guided hands-on project development. The curriculum is designed to ensure that students not only learn core front-end concepts but also apply them immediately through practical exercises and a mandatory mini project.

CONFIDENTIAL

Course Content (Industry Standard Front-End Foundations Program)

Module 1 — Introduction to Web

- Brief history of Internet
- How the Internet works
- Internet Protocol
- DNS servers
- HTTP Protocol
- Web Server vs Application Server
- Architecture of web applications

Module 2 — HTML Foundations

- HTML structure, tags, attributes
- Semantic elements
- Forms & input types
- Tables, lists, multimedia
- Creating multi-page static websites
- Accessibility-friendly markup

Module 3 — CSS Styling & Layouts

- CSS syntax & selectors
- Box model, display types, units
- Flexbox & Grid layouts
- Responsive design (media queries)
- Basic UI/UX styling principles
- Mini Project: Responsive landing page

Module 4 — JavaScript Essentials

- Variables, datatypes, operators
- Functions, events, DOM manipulation
- Arrays, objects, loops
- Form validation with JavaScript
- ES6 basics (let/const, arrow functions, template literals)

Module 5 — HTML + CSS + JavaScript Integration

- Creating interactive user interfaces
- Dynamic content rendering
- Event-based UI components
- Building functional forms with validation
- Mini Project: Multi-step form with validation

CONFIDENTIAL

Module 6 — Tools & Developer Practices

- Working with VS Code
- Chrome Developer Tools
- Debugging techniques
- Basics of Git & GitHub
- Folder structure & clean code practices

Module 7 — Final Mini Project (Mandatory)

Each student will design and build a complete frontend project demonstrating:

- Clean UI structure
- Responsive design
- Interactive JavaScript-based functionalities
- Well-organized code and documentation

Example Projects:

- Portfolio Website
- Product Showcase UI
- Interactive Form System
- Student Information UI
- Mini Dashboard Interface

Program Deliverables

- Live online training sessions (2 Months hours)
- Coding exercises & assignments
- Weekly assessments
- Complete project source code
- Final project presentation
- Internship completion certificate from **ChiPi Technologies**
- Career guidance session for front-end and full-stack development

CONFIDENTIAL

Program Policies, Certification Criteria & Student Responsibilities

Attendance & Participation Requirements

- Students must maintain a **minimum 70% attendance** throughout the training.
- Attendance will be monitored daily.
- Students failing to meet attendance criteria **will not be eligible for certification**, irrespective of project performance.

Project Completion, Submission & Evaluation

Each student must complete and submit the assigned **Frontend Mini Project** within the training duration.

Evaluation parameters include:

- **Correctness:** UI meets functional requirements.
- **Functionality:** Responsive and interactive components working properly.
- **Code Quality:** Clean, readable, standards-compliant.
- **Adherence to Instructions:** Folder structure, naming, design guidelines, responsiveness.

Project Presentation Requirement

Every student must present their project with:

- Demonstration of the working UI
- Explanation of layout, styling, and JavaScript interactions
- Overview of tools and best practices used
- Challenges & solutions
- Key learnings

Presentation is **mandatory** for certification.

CONFIDENTIAL

Viva / Oral Assessment

Students will be evaluated on:

- HTML/CSS fundamentals
- JavaScript basics
- Responsive design understanding
- Ability to explain their code and design choices

Satisfactory performance is required for certification.

Project Submission Extension Policy

Available only in exceptional cases (medical/personal emergencies).
A maximum extension of **one week** may be granted upon review.

Certification Policy

A **Certificate of Completion from ChiPi Technologies** will be awarded only if the student:

1. Maintains 70% attendance
2. Completes & submits the project
3. Delivers a satisfactory project presentation
4. Clears the viva
5. Certificate processing fee of Rs. 300/- will be applicable to get the certificate.

Students failing to meet any criterion will **not receive the certificate**.

Proposed Batch (Tentative)

- **Start Date:** 26-September-2026
- **Mode:** Live Online
- **Time:** Full day for 2 months

This 2-Month **Front-End Development Training Program** aims to provide students with a strong foundation in HTML, CSS, JavaScript, UI design principles, and real-world project execution. With

CONFIDENTIAL

practical exposure, industry mentorship, and structured project development, students will be well-prepared for internships, advanced courses, and future software development roles.

ChiPi Technologies looks forward to collaborating with your institution to deliver an impactful, industry-aligned training initiative.
